

Calimesa Safety Element Update

WE WANT TO HEAR FROM YOU!

Participate in the City of Calimesa's

2026 Safety Element Update Survey

The City of Calimesa is updating its Safety Element, a key component of the General Plan that guides the City's long-term vision over the next 20 to 30 years. The Safety Element identifies natural and human-caused hazards, including climate change-related risks, and establishes policies and actions to reduce threats to life, property, infrastructure, and community stability. It addresses hazards such as wildfires, flooding, drought, earthquakes, landslides, extreme heat, and other potential emergencies to strengthen the City's resilience and preparedness.
